Full Stack Developer - Internet of Things & AI (f/m/x)
Job-ID: FSD-2020-001

home-iX is looking for you to join our team. We're a growing startup from Stuttgart Germany that speaks IoT & AI and helps companies to let their smart services and devices participate in the digital lifestyle. Are you a Techie, who loves Software + Information Technology and want to play an active role in an agile, innovative company? Then home-iX is the right place for you!

Your Profile

- Structured and quality-oriented work in an international team
- English (spoken + written), German
- Experience with Agile Software Development like e.g. Scrum
- Experience in Tools like git, Trello, Jira & Office Suite (Word, PowerPoint & Excel)

- Skills in the following programming languages and technologies
    - Frontend: Angular 8+, React or Flutter
    - Backend: Java, Vert.x & Quarkus
    - DevOps: Kubernetes & Istio
    - DBs: Mongo, Redis & PostgreSQL
    - APIs: HTTP REST, JSON, gRPC, WS
    - AI/ML: Kubeflow, TensorFlow & Keras

Tasks

- Feature development in our Frontend "webGate"
- Feature development in our Microservices based cloud platform "conUgate"
- Feature development of our embedded "microGate" IoT device stack
- Participation in Scrum meetings
- Maintenance of Functional & Technical Design Documentations
- Testing Features

Benefits

- **Individuality:** Remote/Flexible, as you need it!
- **Self-Realization:** Realize yourself, by working in a small team, directly with the founders
- **Responsibility:** Management responsibility in a team that is growing strongly
- **Startup-Culture:** Open-minded, worldwide team
- **Experience:** Working with famous companies
- **BYOD:** Freedom to bring your own device
- **Competitive compensation:** Fixed + ESOP
- **Bonus:** Free Netflix or Spotify Account

Interested? Send us your CV and a short Letter of Motivation to jobs@home-ix.com or call our CEO, Mehmet Arziman at +(49)0711 18 4 29 271 in case of questions.
